

**RGB-1W** features a highly versatile multimode mode, high power RGB module for low-cost applications. It has excellent divergence, high stability and very low heat dissipation. It is built with high quality selected & tested components for high-demand specs and has custom made optics built specifically for our products. It has a long lifetime, is low maintenance and is easy to integrate.

**Specifications:**

Voltage	AC100V-250V, 50HZ/60HZ, Fuse: 2A/250V
Rated Power	20W
Laser	A05RGB: 100mW@650nm wavelength red laser, 100mW@532nm wavelength green laser, 300mW@450nm wavelength blue laser  A05RGB: 200mW@650nm wavelength red laser, 200mW@532nm wavelength green laser, 600mW@450nm wavelength blue laser
